

REVERTER project

Life programme

Warm regards from the REVERTER project team!

"As the project coordinator of REVERTER, I'm pleased to highlight our key achievements thus far. Through rigorous research, we've developed innovative tools to prioritize deep renovation plans and identify households at risk of energy poverty. Our efforts have resulted in the creation of nine tailored building renovation roadmaps and the development of training materials for REVERTER Ambassadors and Operational Support System personnel. We've also established the REVERTER Hub and digital OSS centers, conducted home visits, and organized engagement events. Our reports offer valuable insights and strategies that can be applied beyond our project scope, signaling promising progress in our mission to combat energy poverty and promote sustainable building renovations."

Survey results published are available online

We are excited to announce that the results of the surveys conducted in Coimbra, Portugal; Riga, Latvia; and Athens, Greece, are now available on the REVERTER HUB. These surveys provide valuable insights into the specific energy poverty challenges and needs of these regions, helping us tailor our approaches to better serve vulnerable households.

Energy Ambassador training was a success

The Energy Ambassador training program has been successfully implemented across all pilot countries. The Energy Ambassadors exhibited remarkable enthusiasm and engagement throughout the training sessions, demonstrating a keen interest in the subject matter. Their feedback has been overwhelmingly positive, highlighting the effectiveness of the training materials and the value of the information they received. Moreover, they praised the facilitators for their expertise and guidance during the sessions. This positive response underscores the program's success in empowering individuals to champion energy efficiency and sustainability in their communities.

Energy Ambassador about training

“

“The REVERTER project is a good initiative aimed at helping families with practical and affordable solutions. I decided to volunteer to take part because I believe that improving the condition of people's homes is essential to reducing energy poverty in the country.”

Andre Silva
Energy ambassadors in
Coimbra, Portugal

“

“The Energy Ambassador training was very interesting and inspiring for me! I believe that household visitations in Brezovo by energy ambassadors will help them reduce their energy costs and improve their quality of life. I am glad that I can be part of this project and contribute to improving the well-being of my fellow citizens.”

Mirela Chonovska
Energy ambassadors in
Brezovo, Bulgaria

“

Thank you, REA, for two productive training days. The lectures were interesting and immediately followed by practical sessions. The knowledgeable practicing instructors, engaged audience, cozy spaces, delicious coffee breaks, and lunches—everything was perfectly organized. Sitting in the front row, it was fascinating to monitor the CO2 meter readings. This activity should definitely continue to involve more residents in practical communication with the aim of making residential buildings energy-efficient and renovated!

All REVERTER One-Stop-Shops are operational

The REVERTER project has officially commenced its field activities, marking a significant milestone in our mission to combat energy poverty among vulnerable households. In April 2024, we launched four One-Stop Shops (OSSs) across Europe, located in Brezovo (Bulgaria), the Athens Urban Area (Greece), Riga (Latvia), and Coimbra (Portugal). These OSSs aim to facilitate energy-efficient home renovations, enhancing living conditions for those most in need. After the completion of ambassador and OSS personnel training we are fully operational in all 4 pilot countries.

Consortium meeting in Barcelona

On May 15th and 16th, the REVERTER project team gathered in Barcelona, Spain, for a significant consortium meeting. This two-day event provided an invaluable opportunity for the team to discuss the results achieved so far, address the challenges each team is facing, and plan the way forward. We extend our heartfelt thanks to B.Link for their excellent organization of the meeting, which ensured a productive and engaging environment for all participants.

First takeaways from Digital OSSs

Before delving into the first results and observations, it's essential to understand the diverse nature of the areas where our One-Stop-Shops are established. For instance, Brezovo, Bulgaria, and Coimbra, Portugal, are relatively small areas targeting very specific consumer groups, leading to a limited target audience. Conversely, the One-Stop-Shops in Athens, Greece, and Riga, Latvia, engage with larger groups of people, being situated in the capitals of their respective countries with a larger number of inhabitants.
